Sean was often seen walking his beloved dog Jess around the village. Sean touched the lives of so many people without even knowing it by a simple act of Kindness, a comforting word, or his great sense of humour. He was a loving son and a great friend to many. His family would like to thank everyone for the beautiful tribute made in his memory to remember such a wonderful man.

Defibrillators

We currently have 2 defibrillators in the village. They are located at both ends of the village: The Village Hall, 15 High Street and The Community Centre, Tolhurst Close, Peters Village. We are also hoping to have an additional one installed at the Watermans Arms soon. If needed, call 999. The emergency service will give you the address and access code to access the equipment as well as instruct you in its use.

Lifebuoys

As we all live near a very fast-moving river, it is vital that all our life-buoys are always fit for purpose. They are checked monthly by Councillors and should only be opened in case of emergency. What if it was your son/daughter, mother/father that needed saving and there was no life equipment available?

Public Open Spaces

The message seems to be getting through, but there are still a few irresponsible owners that do not pick up after their dog. We really need EVERYONE to do their bit.

Dog poo is linked to illness, pollution and antibiotic resistance. Dog faeces may contain microorganisms that cause illness in humans such as Salmonella, E. coli, Giardia and internal parasites. Dog poo can also be a potential reservoir for antibiotic-resistant bacteria, meaning humans could develop bacterial infections that are difficult to treat through contact with dog faeces.

Wouldham has the highest number of dog poo bins per capita than anywhere else in the borough and 'poo bag' bottles are located at many points in both the old and new village, so **PLEASE USE THEM!**

Youth & Community Worker

We are delighted to welcome our new member of staff, Ann-Marie Church who is currently planning new youth groups for the Parish. So that she can offer a good range of activities, she needs volunteers. If interested, please contact us. Full training can be given.

Defibrillators

We currently have 2 defibrillators in the village. They are located at both ends of the village: The Village Hall, 15 High Street and The Community Centre, Tolhurst Close, Peters Village. The emergency service will give you the address and access code to access the equipment as well as instruct you in its use.

D DAY 80 Thursday 6 th June, 2024 7pm – 10pm

To commemorate the 80 th Anniversary of D Day, we are having a get-together in the Recreation Ground. A lantern parade, remembrance and 1940's sing-a-long will take place from 7pm on Thursday, 6th June. Nationally, the Beacon lighting will take place on Thursday 6th June at 9.15pm. If anyone has local memories of family members being involved in this important event, which led to the end of WW2, please contact me.

And Finally...

If you would like to become a volunteer driver, or have any suggestions for learning courses, please get in touch with me.

June/July Growing in your garden

Usually the risk of frost has passed by now, and with longer days there comes more sunshine and time to be in your allotment. If the weather is dry, then water your seed drills well before sowing any seeds – this way the young plants will develop a good root system.

Beetroot, broad beans, cabbage, cauliflower, early peas, lettuce, rhubarb, spring onions, radish, spinach can all start to be harvested now. Lift the earliest potatoes towards the end of the month and continue earthing up the rows of your other varieties. June is the end of the asparagus season, so stop cutting and give the plants a top dressing of general fertiliser to help build up the crowns for next year. Start to harvest the first of your soft fruits.

Successional sowings of beetroot, kohlrabi, lettuce and winter cabbage seeds can all be done now – follow the instructions on the back of your seed packets, but it is worth starting them off in trays indoors and then transferring them outside after a couple of weeks. Sow every 2 - 4 weeks for a continual supply of produce.

Brussels sprouts, cabbages, cauliflowers, celeriac, courgettes, outdoor cucumbers, French and runner beans, leeks, pumpkins, squashes, sweet corn, outdoor tomatoes can all be planted out into their final position now. As with all young plants water in carefully and protect from birds with netting.

Watch out for **aphids** (black fly on broad beans and greenfly on various crops) and thrips on brassicas – spray the plant with soapy water (diluted washing up liquid) or squash the flies with your thumb and finger. You can buy insecticides if you prefer, including a fatty acid soap to spray on the plants.

Carrot fly is a particular problem between May and September – when female flies lay their eggs. There are varieties of carrots on the market that have been bred to be more resistant to carrot fly (e.g. Fly Away and Resita-fly) but none are 100% proof. To deter low-flying female flies, cover plants with horticultural fleece or place two foot high barriers around the plants (plastic bottle cloches work well). A biological control (pathogenic nematodes) can be bought from mail-order companies (known as Nemasys

Grow Your Own), to help control the young larvae or you can opt for chemical control in the guise of Westland Plant Rescue Fruit & Vegetable Bug Killer (Lambda cyhalothrin).

Cabbage root fly attacks the roots of brassicas. Female flies lay the eggs on the surface of the soil next to the stem of the plant. When transplanting out young plants, place a piece of carpet (or cardboard or fleece) around the base of the plant to create a collar, this will stop the flies from laying their eggs on the soil. Again the biological control (pathogenic nematodes) can be used to deal with any larvae.

This is the start of potato blight season, and if the weather is wet and humid in July then your crop is likely to be at risk. You can use fungicides containing copper to help protect your crop from the blight; these should be sprayed from June onwards if a wet July is predicted. (Crop rotation the following year is advisable). An infected plant will have a watery rot on its leaves, causing them to collapse – the infected matter should be binned or burned and not placed into your compost, as this will not kill the disease and it will reoccur the following year.

General tips:

- Hoe at every opportunity to remove weeds and break-up the soil. This allows water to soak down into the earth.
- rain in climbing beans and continue to put in supports for your peas. Water along the rows of peas to swell the developing pods.
- Carry on with the thinning out of seedlings of earlier sown crops.
- Don't allow plants growing under glass to dry out or overheat.
- Aim to keep the hoe moving at every opportunity. Water all crops at least once a week. Start to draw the soil up around the base of Brussels sprouts and sweet corn plants to encourage extra roots.
